CSS 플렉스박스

CSS 플렉스박스

```
.container {
    display: flex;
    flex-direction: row; 주축 방향 설정
}
```

row

column

```
.container {
    display: flex;
    flex-direction: row;
    [flex-wrap: wrap;] 줄바꿈설정
}
```

```
.container {
   display: flex;
   flex-direction: row;
   flex-wrap: wrap;
   justify-content: space-between;
} 주축의정렬
```

```
.container {
 display: flex;
 flex-direction: row;
 flex-wrap: wrap;
 justify-content: space-between;
 align-items: center;
 교체축의 정렬
```

CSS 플렉스박스 / 아이템

```
.item1 {
 flex: 2;
.item2 {
 flex: 1 200px;
```

CSS 미디어 쿼리

```
@media screen and (max-width: 900px) {
@media print {
@media (orientation: landscape) {
```
